DUNDEE CITY COUNCIL

REPORT TO: COMMUNITY SAFETY AND PUBLIC PROTECTION COMMITTEE -11 DECEMBER 2017

REPORT ON: ARRANGEMENTS FOR MANAGING HIGH RISK OFFENDERS

REPORT BY: EXECUTIVE DIRECTOR OF CHILDREN AND FAMILIES

REPORT NO: 429-2017

1.0 PURPOSE OF REPORT

1.1 This report summarises the tenth annual report on arrangements for managing high risk offenders across Tayside and covers the period 1 April 2016 - 31 March 2017. A copy of the report is attached as Appendix 2.

2.0 **RECOMMENDATIONS**

It is recommended that the Community Safety and Public Protection Committee:

- 2.1 Notes the content of this report and the ongoing developments in relation to the risk assessment and risk management of high risk of harm offenders.
- 2.2 Instructs the Executive Director of Children and Families to present such reports to Committee on an annual basis.

3.0 FINANCIAL IMPLICATIONS

3.1 None.

4.0 MAIN TEXT

4.1 The Management of Offenders etc. (Scotland) Act 2005 introduced a statutory duty on Responsible Authorities - Local Authorities, Scottish Prison Service (SPS), Police and Health - to establish joint arrangements for the assessment and management of the risk of harm posed by certain offenders. The Act also placed a duty on agencies who come into regular contact with high risk of harm offenders to co-operate in risk assessment and risk management processes. These 'Duty to Co-operate' agencies are those who come into regular contact with high risk offenders and include, for example, Third Sector partners and suppliers of Electronic Monitoring. The Responsible Authorities are required to keep the arrangements under review and publish an annual report.

The introduction of Multi Agency Public Protection Arrangements (MAPPA) in 2007 created a consistent approach towards the implementation of the Act and initially focused on Registered Sex Offenders. In 2008, arrangements were extended to include Restricted Patients who are persons who, by virtue of their mental health, are confined for treatment under current Mental Health legislation and present a risk of harm to the public. In 2016, arrangements were further extended to include 'Category 3' persons, defined as anyone who has been convicted of an offence and by reason of that conviction, is considered to present a high or very high risk of serious harm to the public and requires multi-agency management. These people have typically committed a serious, violent offence(s) and are also subject to statutory supervision.

In Tayside, a MAPPA Strategic Oversight Group (SOG) oversees developments and consists of the Responsible Authorities, local Duty to Cooperate agencies and Victim Support. Where an RSO subject to Notification Requirements is also subject to a Community Payback Order or

License Conditions after serving a prison sentence of 4 years or more, they are managed jointly by the Local Authority and Police Scotland. Where only Notification Requirements apply, the lead agency is Police Scotland. The lead for Restricted Persons is the NHS and for Category 3 persons, the Local Authority. In all cases, offenders are assessed at Levels 1, 2 or 3 and managed proportionately in accordance with risk. However, the management of MAPPA offenders can be a complex task and constantly involves information sharing, analysis, defensible decision making, collaborative actions, case reviews and case planning.

4.2 **Developments in MAPPA in 2016-17**

4.2.1 In November 2015, a national MAPPA Thematic Inspection carried out by Her Majesty's Inspectorate of Constabulary (HMIC) and the Care Inspectorate concluded that 'there is strong evidence that MAPPA is well-established across Scotland' and that 'MAPPA is effective in contributing towards keeping people safe'. The inspection made 10 recommendations for the Scottish Government to work on with Responsible Authorities. In June 2017, HMIC and the Care Inspectorate published a progress review in which it outlined that 8 of these recommendations had been met or partially met. The 2 unmet recommendations related to national guidance on monitoring social media devices and the efficient and effective use of the Violent and Sex Offender Register (VISOR) by Criminal Justice Social Work (CJSW). Locally, monitoring social media devices continues to be informed by existing data protection legislation and CJSW is one of the highest national users of VISOR. The inspection also highlighted 17 areas for development and local progress made in implementing these is illustrated in Appendix 1.

From a Dundee perspective, the inspection confirmed that the co-location of multi-agency staff, involving the Tayside MAPPA Co-ordinator, dedicated Health and Housing Liaison Workers, Social Workers and a Police Scotland Offender Management Unit, provides a solid platform on which good risk assessment and risk management practice can be developed. However, practice is continually monitored and reviewed. In respect of learning from Initial Case Reviews (ICRs) and Significant Case Reviews (SCRs), the threshold for reporting cases was widened last year to include circumstances "when an offender managed under MAPPA at any level is charged with an offence listed in Schedule 3 of the Sexual Offences Act 2003". The outcome of an ICR was that all under 18's are now case managed or overseen by the specialist co-located Public Protection Team. No cases progressed to an SCR in 2016-17.

As part of the national preparation for the extension of MAPPA to include Category 3 offenders, the Risk Management Authority (RMA) delivered Risk Practice Training courses across the country. In total, 7 Social Work courses were attended by 152 social workers, 6 Police courses were attended by 125 Police officers and 1 MAPPA Chair event was attended by 27 MAPPA Chairs. A further 9 courses are planned for the year ahead. Relevant Social Work staff in the three Tayside Local Authorities and D Division Police Scotland staff all successfully completed this training. The training involved a focus on the assessment of offenders with a potential to commit serious harm through Risk of Serious Harm (ROSH) assessments and the development of robust risk management plans.

To date, a small number of individuals across Tayside have been risk assessed and risk managed as Category 3 offenders. As a result of close supervision, monitoring and information sharing between the Responsible Authorities, some have been breached for failing or refusing to comply with requirements and were returned to custody by the Parole Board. This is evidence that the multi-agency scrutiny achieved through MAPPA can help quickly identify issues of non-compliance and ensure robust action is taken to protect members of the public from any escalating risks. The others continue to be managed on a multi-agency basis and none has committed any further offences. This also suggests that offenders can be effectively managed in the community, with an ongoing capacity to take enforcement action should this be required.

4.2.4 Key Data

• As of 31 March 2017 there were 361 registered sex offenders (RSO) within Tayside, a decrease of 8 offenders since March 2016.

- 25% of the managed RSOs have convictions for internet offences, which have increased in recent years.
- 174 are managed jointly by Police and Social Work, an increase of 41 from the previous report.
- This relates to a change in reporting, with RSOs in custody and subject to a MAPPA review now being included in the figure
- 48% of RSOs are on statutory supervision involving a Community Payback Order with supervision requirements or License Conditions from custody.
- The distribution of RSOs across the 3 authorities is Dundee 154, Angus 102 and Perth and Kinross 105.
- There are 27 Restricted Patients managed by NHS Tayside, a decrease of 1 from the last report.

4.3 Future Developments for 2017/2018

In 2017-18, MAPPA will continue to focus on RSOs, Restricted Patients and Category 3 offenders posing a serious risk of harm. The priorities for the year ahead will be to raise public awareness of MAPPA, to review Information Sharing Protocols with Registered Social Landlords and to continue joint developments with the other Protecting People fora. A newly formed MAPPA Operational Group will carry out an audit of the MAPPA activity and will ensure learning will be cascaded to all agencies. In Dundee, the MAPPA Balanced Scorecard, highlighting key areas of performance and continually promoting in depth scrutiny of practice, will continue to be reported to the Chief Officer Group.

5.0 POLICY IMPLICATIONS

This report has been screened for any policy implications in relation to Sustainability, Strategic Environmental Assessment, Anti-poverty, Equality Impact Assessment and Risk Management. The effective management of known sex offenders and restricted patients within our communities is in-keeping with the Council's Risk Management Strategy of identifying, evaluating and controlling risk.

An Equality Impact Assessment is attached to this report.

6.0 CONSULTATIONS

The Council Management Team have been consulted in preparation of this report.

Appendix 2

MAPPA Annual Report 2016-17

Introduction

Welcome to the Tayside MAPPA Annual report 2016-17. This report summarises the work undertaken to progress and develop local public protection arrangements. Included is key information on the operation of Multi-Agency Public Protection Arrangements (MAPPA) across the Tayside area relating to the management of sexual offenders and certain high risk offenders. The statistics provided shows the number of offenders managed under MAPPA by both category of offender and the level at which they are managed. The report further describes work undertaken by agencies involved in MAPPA locally to contribute to the protection of the public.

Kathryn Lindsay

Chair of Tayside MAPPA Strategic Oversight Group

THE LAST 12 MONTHS

Extension of MAPPA

On 31 March 2016, MAPPA arrangements became available to support the management of offenders on statutory orders who are deemed to pose a risk of serious harm, but who are not Registered Sex Offenders nor Restricted Patients.

Since implementation of this MAPPA extension, six Tayside offenders have been managed through MAPPA who would not otherwise have been subject to these arrangements. Three of these offenders have been returned to custody for breaches within their supervision.

In preparation for the extension, the Risk Management Authority delivered Risk Practice Training courses across the country with 7 Social Work courses = 152 social workers being trained, 6 Police courses = 125 Police officers being trained and 1 MAPPA Chair event where 27 MAPPA chairs attended. A further 9 courses are planned for the year ahead.

Tayside agencies have been active in securing places at all courses to support the rollout. Staff from Social Work in the three local authorities and D Division Police Scotland, Offender Management Officers completed this training.

Strategic Collaboration

The MAPPA Co-ordinator continues to link with lead officers for Child and Adult Protection and is now a member of the Protecting People Angus group.

The MAPPA Co-ordinator has also maintained links with colleagues in the Scottish Prison Service around the rollout of the MAPPA extension and the local arrangements for assessing and managing risk in the community.

CORE STATISTICS

On 31 March 2017, there were 361 offenders at liberty in Tayside with 174 (48%) subject to a statutory supervision order with Criminal Justice Social Work and managed jointly under MAPPA with Police Scotland.

The number of offenders managed in each area is detailed below:

- ANGUS 102
- **DUNDEE** 154
- PERTH & KINROSS 105

In 2016/2017, 13 offenders (3%) were recalled to custody for a breach of a statutory order and 6 offenders (1.6%) were convicted of committing a further serious crime. Further statistical information is available at Appendix A.

STRATEGIC PUBLIC PROTECTION LINKS

Following on from the national thematic inspections, the Tayside MAPPA Strategic Oversight Group (SOG) oversaw the implementation of the 17 identified areas for development. To support this work, a group of key operational staff were involved in establishing the MAPPA Operational Group (MOG) taking responsibility for ensuring that improvements become imbedded in core business across each of the agencies in Tayside.

Where persons managed under MAPPA processes commit, or attempt to commit, further serious crime the circumstances are examined according to national guidance. This year, the threshold for reporting cases for consideration of a Significant Case Review (SCR) changed to include "when an offender managed under MAPPA at any level is charged with an offence listed in Schedule 3 of the Sexual Offences Act 2003". This change has resulted in an increase in the number of cases notified to the MAPPA SOG Chair with 12 cases having been notified during the reporting period. Local processes have been developed to ensure that learning from reviews is shared with the relevant staff.

More information on the arrangements for notification of incidents of reoffending significant case reviews can be found in the MAPPA Guidance 2016.

The governance structure of MAPPA in Scotland has evolved with a new MAPPA National Strategic Group (NSG) supported by the MAPPA Development Group (MDG) and the MAPPA Co-ordinators Group. Members of the Tayside SOG attend all of the above named groups which ensures that any new information is quickly disseminated to the agencies working with MAPPA in Tayside.

FUTURE DEVELOPMENTS

The following priorities have been identified for 2017/18

- Raising awareness of MAPPA and the extended remit
- Linking to other public protection fora
- Carrying out a audit of MAPPA activity
- Progress the work of the MOG in ensuring learning from self evaluation activities and inspection is implemented across all agencies

CASE STUDY

The work of the Responsible Authorities is complex and cuts across many shared boundaries, the following case study is a day in the life of a Public Protection Team Social Worker and gives an example of how joint working arrangements between agencies work in practice.

Being a social worker in a public protection team involves a range of activities including:

- Writing assessments and reports for courts to assist sentencing decisions
- Providing professional support services in Court
- Coordinating and managing the supervision of people placed on a community payback order
- Preparing assessments and reports for the Parole Board to assist decisions about release from prison

- Supervise people who are subject to parole or other forms of post-custodial supervision requirements Monitor compliance with specific legal requirements and respond to information received from other sources, including notifying the Court or Parole Board of any breach of requirements
- Participating in a broad range of duties as part of the wider criminal justice social work service locally.

A SOCIAL WORKERS DAY

I have been a Social Worker for 26 years and currently work with the Public Protection Team in Dundee. The following is a typical day:

Leaving the house at 0815 hours I drive to Perth prison for a meeting to discuss the parole hearing of Mr V who is serving a sentence for sexual offences against children. Mr V is a man in his 40s with a history of previous sexual offending and is currently serving a sentence of 4 years custody with a similar period of compulsory supervision on release. This means that he will be supervised by me as his Community Justice Social Worker for 3 years following his release from prison. He will also be supervised indefinitely by Police Scotland as a registered sex offender.

The meeting at Perth Prison is attended by myself, the prison meeting co-ordinator, prison based social worker, residential officer, my community public protection team leader and Mr V. It is a preparole meeting to prepare for a pending parole tribunal. We discuss all the necessary risk assessments and use the session to further assess Mr V's motivation to engage meaningfully with supervision on his release, including his willingness to complete an offence focused treatment programme on any return to the community. We go through the content of a recently completed Home Background Report which will also be made available to the Parole Board to ensure that Mr V is aware of the assessment and recommendations around what will be required of him post release.

The meeting ended at 1030 hours and I then drove to Dundee where the rest of my appointments were scheduled.

At 1130 hours, Mr X attended at the office for our fortnightly appointment, he is subject to life licence having been convicted and sentenced to a life term for murder. This is Mr X's second period of supervision in the community. Following his first release, he was returned to custody following an increase in the assessed level of risk. He then engaged with further offence focused work, the mental health team and successfully completed a programme around substance misuse leading to him becoming drug free. During our appointment, Mr X discussed told me what he has been doing over the past fortnight and shared how his mental health has been. He continues to keep himself busy, although has a very isolated lifestyle. There are no concerns about his engagement and compliance with his licence conditions.

I update our electronic case recording systems with the details and decisions from the morning's appointments and grab lunch.

At 1430 hours, Mr Y a man in his 20s, attended for his weekly appointment. I manage Mr Y's licence, he was convicted of sexual intercourse with adolescent females and sentenced to 2 years imprisonment with a similar period of compulsory supervision on release. Mr Y is subject to strict licence conditions. His circumstances have become much more settled since he secured his own tenancy and was able to leave homeless accommodation. He has also started a college course which is adding structure and purpose to his life. These improvements in the stability of Mr Y's lifestyle and circumstances directly contribute to reducing his risk of further offending. Mr Y's attendance at our appointments is mandatory. He had missed a previous meeting and we discussed the reasons for this. He appeared to have prioritised a meeting about his housing situation but to mark the seriousness of not keeping in touch as agreed, I issued a formal warning for non-attendance. In the event that he can provide evidence of his meeting about housing, I can withdraw the warning. If further warnings are issued, I can submit a formal report detailing concerns about his engagement and he may be recalled to custody.

We covered general updates on his activities and circumstances, using his weekly journal and then undertook some specific work around relationships and offending behaviour. A colleague from the Tay Project, which is the team who deliver the offence focussed 'Moving Forward Making Changes' programme, joined our appointment and provided feedback from Mr Y's recent group session. Mr Y will continue with this work until he completes the programme.

At 1530 hours, I undertake an unannounced home visit to Mr Z with a colleague from Police Scotland offender management unit. Mr Z is currently subject to a 3 year Community Payback Order following a conviction for the possession of indecent images of children. The order includes strict conditions that he must adhere to or his order will be returned to the Court. Mr Z was getting ready to go out as we arrived, and stayed to engage in the visit. He told us of matters affecting his day to day life, financial issued and difficulties in finding employment. He was reminded not to undertake any work without my prior approval.

I noted Mr Z's positive presentation during the visit as I am aware that his mood has been known to dip. He reported that his mental health was improving and told me of his plans to discuss coming off his medication with his Doctor. The offender management officer examined Mr Z's telephone and computer to confirm that there are no files of concern and confirm that Mr Z does not have internet access. He reported no issues with his neighbours stating he keeps himself to himself. At the conclusion of the visit Mr Z was given his next appointment which will be in the office. At 1700 hours I returned to the office to complete the case recording, paperwork and updated the risk assessments on ViSOR (the shared database used by all responsible authorities).

Appendix A

STATISTICS FROM 1 APRIL 2016 UNTIL 31 MARCH 2017

Table 1: Registered Sex Offenders		
REG	SISTERED SEX OFFENDERS (RSO's)	
(a)	Number of Registered Sex Offenders:	
	(i) At liberty and living in your area on 31st March :	361
	(ii) Per 100,000 of the population on 31st March:	
(b)	The number of RSO's having a notification requirement who were reported for breaches of the requirements to notify between 1 April and 31 March:	14
(c)	The number of "wanted" RSOs on 31 st March:	0
(d)	The number of "missing" RSOs on 31 st March:	0
