

## **2 FINTRY NORTH RESIDENTS ASSOCIATION - CHEVIOT PROJECT (AN131-2003)**

The Fintry North Residents Association have approached the Council to develop a former playground site to the north of Cheviot Crescent in Fintry as a multi purpose recreation area. The facility is being developed by the local community to provide a much needed facility for local children. The Association have received initial funding in 2002/03 from SIP's to develop the site and are actively seeking further funding for complete development of the facilities.

In order for the Association to take forward the project the Committee are requested to approve the initiative to progress the proposals on Dundee Contract Services ground and for officers to assist the Association developing the site. The first phase of the work involves installation of floodlighting by Dundee Contract Services, which will be funded entirely by finance from SIP's. Later phases of the project will include surfacing work, fencing and provision of sports equipment.

On completion of the work and further developments, the Department will make provision for additional revenue funding at the appropriate time.
