

### **3 PURCHASE OF SKIP CONTAINERS (AN194-2015)**

The Council provides a range of skip services to domestic and commercial customers as well as servicing the storage and movement of waste from council recycling centres and processing sites. A number of skip containers are now considered to be beyond economic repair and in need of replacement, and additional skip containers are required to bulk load food waste prior to it being transferred to an appropriate food waste treatment facility.

The skip containers can be obtained through the Scotland Excel Procurement Framework "Supply and Delivery of Waste Disposal Equipment 13-11". The skip containers recommended for purchase are from Skip Units, Sinfin Lane Industrial Estate, Derby and are detailed below:

- Supply two – 20 cubic yard demountable skip containers for the sum of £5,770
- Supply two – 30 cubic yard food waste containers for the sum of £11,117
- Supply four – 40 cubic yard demountable skip containers for the sum of £14,000

The Executive Director of Corporate Services advises that the total cost of £30,887 for the skip containers can be met from allowances within the Capital Plan 2016-21, Purchase of Skips.

Committee is asked to approve the purchase of this equipment.
