

## **5 CAIRD PARK STADIUM - LANDSCAPE IMPROVEMENTS (AN467-2005)**

The Director of Leisure and Communities, as part of the Caird Park Management Plan, aims to improve the entrance to Caird Park Stadium. The proposals include the formation of soft landing to include the installation of the Caird Fountain memorial which currently sits on land held by the Scottish Executive and maintained by BEAR Scotland.

Approval is sought to commence negotiations with the Scottish Executive. A further report will be submitted for approval with identification of costs and funding available.

This part of the proposal would see the removal of the memorial from the Kingsway and stored within Caird Park Stadium to await landscape proposals which will be presented to the Committee at a later date. All remedial repairs required will be carried out to the memorial whilst it remains in storage until landscape proposals are known.

It is recommended that the proposals are agreed to save the memorial from deteriorating further and that the Director of Leisure and Communities be remitted to contact the BEAR Scotland to progress works.
