

REPORT TO: PERFORMANCE & AUDIT COMMITTEE – 29 JANUARY 2025

REPORT ON: DUNDEE HEALTH & SOCIAL CARE PARTNERSHIP CLINICAL, CARE & PROFESSIONAL GOVERNANCE ASSURANCE REPORT

REPORT BY: CLINICAL DIRECTOR

REPORT NO: PAC8-2025

1.0 PURPOSE OF REPORT

1.1 This is presented to the Performance and Audit Committee for:

- Assurance

This report relates to:

- Government policy/directive
- Legal requirement

This aligns to the following NHSScotland quality ambitions:

- Safe
- Effective
- Person-centred

This report provides evidence of the following Best Value Characteristics:

- Equality
- Vision and Leadership
- Effective Partnerships
- Governance and Accountability
- Use of Resources
- Performance Management
- Sustainability

2.0 RECOMMENDATIONS

It is recommended that the Performance & Audit Committee (PAC):

2.1 Provide their view on the level of assurance this report provides and therefore the level of assurance regards clinical and care governance within the Partnership. The timescale for the data within this report is to 30 November 2024.

2.2 As Lead Officer for Dundee HSCP I would suggest that the level of assurance provided is: Reasonable; due to the following factors:

- There is evidence of a sound system of governance throughout the HSCP.
- The identification of risk and subsequent management of risk is articulated well throughout services.
- There is ongoing scope for improvement across a range of services, in relation to the governance processes, although this is inextricably linked to the ongoing difficulties with recruitment and retention of staff.

- There is evidence of noncompliance relating to a fully comprehensive governance system across some teams, i.e. contemporary management of adverse events and risks.

3.0 FINANCIAL IMPLICATIONS

3.1 None.

4.0 BACKGROUND

The role of the Dundee HSCP Governance Group is to provide assurance to the Dundee Integration Joint Board (IJB), NHS Tayside Board (through the Clinical Governance Committee) and Dundee City Council, that there are effective and embedded systems for Clinical, Care and Professional Governance in all services within Dundee HSCP.

The GIRFE Framework is an agreed tool used by all three HSCPs to ensure consistency of approach between Local Authorities, Tayside NHS Board and the IJBs for the three HSCPs; quality assurance is assessed against an agreed, prioritised common data set for each of the governance domains as detailed below.

The six domains continue to evolve over time and must be adaptable and responsive to the changes in legislation and external support and monitoring. The domains reflect the principles set out in the Health and Social Care Standards, My support, My life; Scottish Government, 2018 and the Quality of Care Approach, HIS and Care Inspectorate, September 2018. The domains are:

Information Governance
Professional Regulation and Workforce Development
Patient / Service User / Carer and Staff Safety
Patient / Service User / Carer and Staff Experience
Quality and Effectiveness of Care
Promotion of Equality and Social Justice

5.0 ASSESSMENT

a. Clinical and Care Risk Management

a.1 Lack of resource to deliver the benzodiazepine dependence pathway compliant with guideline, DDARS

Datix Ref	Risk Exposure - No Controls			Current Risk Exposure Rating												Planned Risk Exposure			Risk Trend (↑/→/↓)				
				Please include data from previous four reporting periods																			
				16/2/24			26/6/24			17/10/24			16/12/2024

L = Likelihood C = Consequence RER = Risk Exposure Rating

- a.2 Three of the top 5 risks sit with the Dundee Drug and Alcohol Recovery Service (DDARS). There are ongoing service pressures due to staff turnover that affect all of the key risks identified although it is noted this has slowed considerably and the team are approaching a full complement of staff.

This increase in staffing has helped however we recognise that the people using the service have an increasingly high level of complex needs and due to the Medication Assisted Treatment (MAT) programme we have had to commit significant resources to new interventions such as two Buvidal® clinics that run all day 5 days a week. Dundee continues to be one of the best performing HSCPs in Scotland in relation to the MAT Standards.

- a.3 Risk 233 had shown a current risk score in excess of the inherent risk score since April 2023. This was primarily due to ongoing challenges relating to recruitment and retention into the DDARS service. This is starting to ease as noted above.

Acuity and dependence levels continue to intensify within the patient group requiring intensive input from staff including adult support and protection concerns. Housing and homelessness are proving to be an issue for our most complex patient group where mainstream housing is not adequate for their needs.

While this is not within DDARS complement of staffing, the absence of hospital liaison staff is resulting in risks attached to the management of the patients for drugs and alcohol use in acute care results in additional demands for nursing staff.

Two locums remain in post and plans to advertise for substantive posts are progressing. These posts are required to maintain safe clinical services, same day prescribing, Buvidal® prescribing, support for non-medical prescribers and advanced nurse practitioners, medical trainees, GPs with special interest and the specialty doctor.

There has been a significant amount of work achieved over recent years to increase the diversity of the nursing role. This has resulted in the increase of non-medical prescribing and advanced nurse practitioner roles.

DDARS has seen growth in the staff group who have prescribing competencies. At this time there are 7.4wte nursing staff who can prescribe (two previous NMPs promoted within the service to non-clinical roles) and seven trainees, which include the primary care project staff and child and family nurses.

Training is ongoing: two staff will complete training within next four months, one additional staff member within ten months with four staff currently planning start dates.

The longer-term workforce plan is to have three non-medical prescribing staff for each team. This would result in an additional 3.6 staff (18 in total) with prescribing competencies to achieve this, based on current need.

There are currently two Advanced Nurse Practitioners (ANPs) and one trainee ANP, who have been providing intensive support to individuals where there are co-occurring physical conditions. This intensive input has been integral in ensuring people access the right care at the right time ensuring positive outcomes.

The benzodiazepine dependence pathway is currently being considered via a National Taskforce who are considering the possible models of practice. There is no update on progress of this since the last committee meeting.

a.4 Capacity issue due to vacancy and new staff – Dietetic Diabetes Team

Datix Ref	Risk Exposure - No Controls			Current Risk Exposure Rating												Planned Risk Exposure			Risk Trend (↑/→/↓)				
				Please include data from previous four reporting periods																			
							09/03/2024			17/10/2024			16/12/2024										
	L	C	RER	L	C	RER	L	C	RER	L	C	RER	L	C	RER	L	C	RER					
1434	5	4	20				4	4	16	4	3	12	4	3	12	3	2	6	→				

L = Likelihood C = Consequence RER = Risk Exposure Rating

The dietetic diabetes team comprises four staff (3.2wte). There has been rapid turnover of staff within the team which has led to a reduction in knowledge and skills which is being addressed through comprehensive induction and educational processes. There is only one full time member of staff with the knowledge and skill to comprehensively induct and educate the two new starts which is prolonging the process. A number of mitigations have been explored including:

- Successful international recruitment.
- Requests have been made to other health boards to support education and training. Currently there have been no offers to support due to capacity issues across Scotland.
- Investigation of clinical support from within and out with NHS Tayside.
- Following robust dietetic risk assessment has been undertaken to identify priority patient groups.
- Following robust dietetic risk assessment specific groups of patients have been identified who can self-manage with support from written or video information with minimal risk.
- Where appropriate, patient education groups are used as an alternative to one to one appointments.
- Clinical admin processes have been reviewed and streamlined to protect direct patient care.
- All videos and leaflets have been uploaded to the Diabetes MCN website to enable easier access for patients and clinicians.

a.5 Capacity to Exercise Guardianship Duties (Learning Disabilities)

Datix Ref	Risk Exposure - No Controls			Current Risk Exposure Rating												Planned Risk Exposure			Risk Trend (↑/→/↓)				
				Please include data from previous four reporting periods																			
							10/06/2024			17/10/2024			16/12/2024										
	L	C	RER	L	C	RER	L	C	RER	L	C	RER	L	C	RER	L	C	RER					
1343	5	3	15				5	3	15	4	3	12	4	3	12	3	2	6	→				

L = Likelihood C = Consequence RER = Risk Exposure Rating

As a result of the limited capacity of the learning disability team to undertake Guardianship duties, there is a risk that people under family Guardianship scrutiny may not receive a suitable level of support and those awaiting allocation of a Local Authority Guardianship will experience delays in care.

The team have established a process for the prioritisation of renewals to ensure there are no lapses in orders and this is closely monitored by the team manager. Appropriately trained mental health officer staff are able to work additional hours on an ad hoc basis to support.

New Risks

No new risks have been added to the system in this reporting period.

b. Workforce Risks

- b.1 There are a number of risks (13, increased from 12) pertaining to workforce availability across a wide spectrum of professions, including nurses, medical staff, allied health professions and social care staff. The vast majority of teams are affected to some degree, often with mitigations impacting on those teams who are able to recruit staff. Work continues to enhance recruitment and retention, with international recruits now being widely employed. Staff wellbeing remains a focus for the HSCP.

Primary Care (PC) Sustainability Risk – Strategic Risk 1374

- b.2 The Sustainability Primary Care Services Risk current rating remains at 20 (Red / Very High), having been reduced in 2023 from 25 following the implementation of some of the more strategic and leadership actions across Tayside. This risk is categorised as a Quality (of Care) Clinical risk. There are currently 21 GP practices in Dundee.

This risk recognises that a failure to maintain sustainable Primary Care Services in localities and across Tayside will result in a failure to meet both the National Clinical Strategy and will have a negative impact on both patients and staff. The risk arises as a result of an inability to:

- Reliably recruit, train and retain workforce;
- Have appropriate premises arrangements to deliver clinical and support services, and
- Have in place adequate digital systems to support clinical care and communication between teams, patients and across the services. This risk encompasses all Primary Care contractors; Dental, Optometry, General Practice and Community Pharmacy.

A second sustainability survey was undertaken with GP practices across Tayside in February 2024 which gathered more data on workforce and general information on other issues impacting on a practice's sustainability. The preliminary analysis of the second survey indicates that 20% of Dundee practices consider their future sustainability to be a risk. The factors contributing to this included GP partner leaving/retirement, increased patient demand versus capacity and independent contractor practices noting some or significant impact on sustainability risk arising from leasing/ownership of premises. An interim survey focussing on workforce was issued in September 2024 to monitor the position.

Local actions and controls have been, and continue to be, developed, and reviewed. These actions seek to increase capacity, manage demand and address barriers by taking forward actions within the control of the HSCP.

The workstreams linked to the Primary Care Improvement Plan are mostly fully recruited to, except for the pharmacy team which has ongoing challenges, despite innovative approaches to increasing skill mix. There is the potential to further develop these teams but there is no resource to do so.

However, the increasing demand for GP and the wider Primary Care team is such that any improvement or shift of clinical workload has been offset by that demand. Dundee is therefore in a position of having had three practices closing in a three year period. Numerous practices have had periods with closed lists and being unable to accept new registrations.

Dundee has a Premises Strategy and a wider GP strategy agreed and is working to progress this. The removal of the burden of ownership, or leasing of premises is critical to the recruitment of new GPs partners and there has been limited progress regionally and nationally for this but at 30 September 2024 there has been no progress regionally with leases transferring to NHS Tayside. In total three Dundee practices have received a GP sustainability loan (as at April 2024). However, the loan scheme for 2023/24 had been oversubscribed and Scottish Government needed to fund the completed loans before accepting any further tranche one agreements. Scottish Government are not yet in a position to say when tranche two applications would be opened.

Resource had been identified locally to support the GP career start programme which is key to supporting some practices remain stable, but longer term funding is still not in place.

The local development and further integration of urgent care teams and the development of roles in other primary care-based teams, will continue to contribute positively, such as the advanced district nurse role.

Treated/Archived Risks

- b.3 Treated/Archived Risks are those that have all planned/proposed control in place, and the risk has been mitigated to the lowest possible level.

There has been no risk treated/archived with the time period.

Closed Risks

- b.4 Closed Risks are risks that have been replaced or superseded and are therefore no longer required to be managed.

There have been no risks closed in this reporting period.

Clinical & Care Governance Arrangements

- b.5 The arrangements for clinical, care & professional governance (CCPG) in the Dundee HSCP are outlined in Appendix 1: Dundee HSCP Governance Structure.

During this reporting period exception reports were presented to the CCPG Group from the following services as outlined in the table below.

To support enhanced compliance and to meet internal audit recommendations, the production and presentation of exception reports is being more closely monitored. The Clinical, Care and Professional Governance Group are also reviewing frequency of annual reports and exception reports to support management capacity. The following table details where assurance reports have been submitted and if a member of the service was present to speak to the report or provide a verbal update.

MEETING DATE	24 Apr 2024		20 Jun 2024		14 Aug 2024		9 Oct 24		4 Dec 24

c. Adverse Event Management

- c.1 The following graph shows the impact of the reported adverse events by month over the past 18 months. There were 400 adverse events reported in this time period (01/10/2024-30/11/2024). There is an increase in minor events with a small rise in mortality learning events, the majority of these are reported through Expected Death categories (20 of 32 reported adverse events).

The ratio of events with harm to events with no harm is 1 to 3.8. This is a decrease from the previous report.

- c.2 The following graph shows the Top Five Categories reported between 01/10/2024 and 30/11/2024.

These categories account for 245 of the 400 events (61%) reported within the time period.

Slips, Trips and Falls

- c.3 There were 108 events reported between 01/10/2024 and 30/11/2024. This is a decrease of 27 from the last reporting period. The following table shows slips, trips and falls by severity over the past 18 months:

- c.4 The following chart shows the number of slips, trips and falls (In-patients only) by location, with the highest number of falls being across Psychiatry of Old Age. Inpatient teams continue to review all falls to ensure all preventative measures are in place and that post-falls reviews are undertaken. The level of harm resulting from a fall remains low.

- c.5 The above graph (c.4) shows an increase of 3 in inpatient falls over this reporting period. A review of the adverse events shows a number of individuals were responsible for multiple events across a number of ward areas. The severity of these adverse events remains low with minimal harm to patients (bruising, skin flaps) and no harm to staff.

Medication Adverse Events

- c.6 There were 34 events reported between 01/10/2024 and 30/11/2024. This is an increase of 2 from the last reporting period. Within this there were 16 separate subcategories reported across ten different clinical teams. There are no clear themes or patterns identified within teams or across the HSCP. The majority of these events occur in the patients' homes (19) with the most commonly occurring subcategory being Missed Dose by Staff (6), with four within District Nursing.

Each adverse event is followed up within the team to identify learning and any required improvements with those involved undertaking reflection. This frequently includes working closely with our pharmacy colleagues.

A number of these incidents identified adverse events in other parts of the system that were identified via HSCP teams, e.g. discharged without correct medicine. Follow up discussions are held with teams to support learning and management of risk.

Documentation/Administration

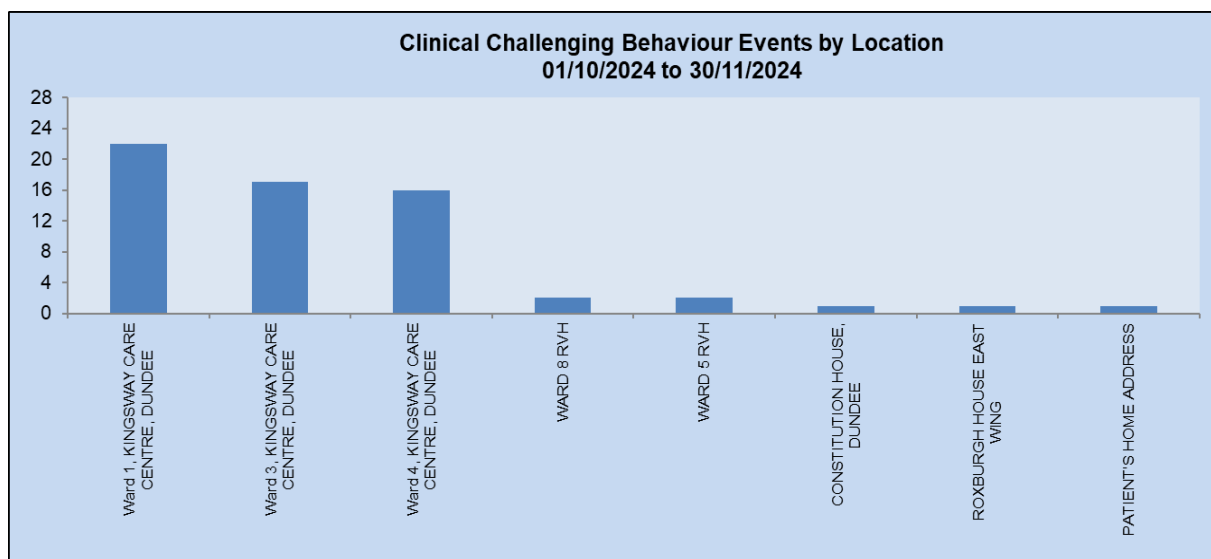

- c.7 There were 28 events reported between 01/10/2024 and 30/11/2024. This shows an increase of 9 from the last reporting period. The chart below shows the documentation/administration events by location.

The high number of incidents reported this period was primarily due to failed communications errors (8). They all occurred over five different clinical teams with no clear themes.

Clinical Challenging Behaviour

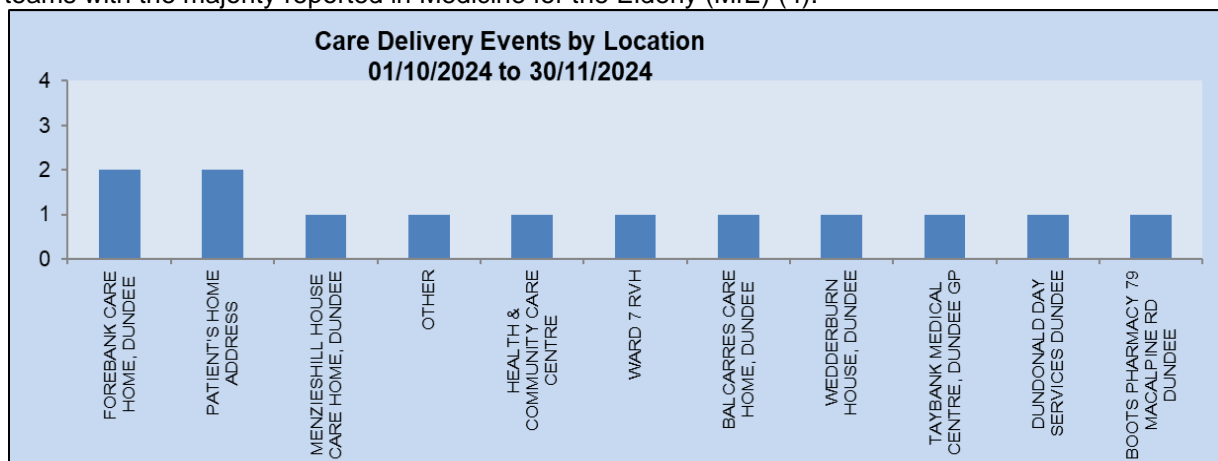

- c.8 There were 62 events reported between 01/10/2024 and 30/11/2024. This is an increase of 27 from the last report. The chart below shows the clinical challenging behaviour adverse events by location.

The majority of these events occur in our Psychiatry of Old Age service. There are an increasing number of patients being admitted with high levels of stress and distress. There is very positive evidence of these incidents being well managed with staff being well supported as outlined in the post incident reviews that are carried out.

Care Delivery

- c.9 There were 13 events reported in this reporting period. The high number of incidents reported this period was primarily due to discharge problems (6). They all occurred over 3 different clinical teams with the majority reported in Medicine for the Elderly (MfE) (4).

Other Event Categories

- c.10 There were 123 events reported outwith the top five events and Mortality events reported. These are listed in the chart below.

Significant Adverse Event Reviews

- c.11 There are currently two active Significant Adverse Event Reviews in Dundee HSCP. One of these is now ready to be signed off. Once complete, a learning summary will be shared with the committee.

Pressure Ulcers & Falls

- c.12 There have been 12 pressure ulcer events reported between 01/10/2024 and 30/11/2024. This is an increase of 6 on last reporting period. The number of pressure ulcers reported over the past 18 months is shown in the following graph, by subcategory.

Where pressure ulcers develop on a ward or caseload this is consistently reviewed and within community services is predominantly as a result of patients and families not following the clinical advice provided by the nursing team. The team will work with families and patients to educate and support as much as possible in these situations, ensuring patient-centred care, particularly during palliative and end of life care.

Where pressure ulcers are noted on admission to a caseload or ward, work investigations are commenced to ensure all preventative steps have been taken, with all relevant services collaborating.

Adverse events management – Systems and Processes

c.13 Overdue Unverified Events

At the time of data extraction, there were 12 unverified events. This is a decrease of 23 since last reporting period. Of these unverified events, 12 had exceeded the timescale of 72 hours for verification.

The following graph shows the unverified events by the severity and the number of days overdue.

The Dundee HSCP Governance Huddle meets weekly and will review unverified adverse events and provide prompts to managers to take action for outstanding events. If an adverse event might need immediate action, the huddle will escalate to other members of the team for action and review.

c.14 Overdue Verified Events

There are 361 (346 last reporting period) events that are verified but overdue for completion within Datix.

The following graph shows the length of time that has elapsed since the reporting of the events at the time of data extraction by severity for those events that are overdue for completion.

c.15 The table below shows the number of overdue events by the year and department.

Department	2019	2020	2021	2022	2023	2024	Total*	Change**

* Figures in brackets relate to the October 2024 report

** Since October 2024 report

There has been a longstanding concern regards the overdue verified events. The focus for teams is very much on contemporary adverse events rather than historical adverse events due to the current longstanding issues with workforce availability. Other factors also contribute to these adverse events not being progressed including: awaiting toxicology results, Procurator Fiscal involvement, awaiting information from other agencies (e.g. Police Scotland) and awaiting responses from other services in NHS Tayside.

There has been a renewed focus on these through our Clinical, Care & Professional Governance Group. Mental Health & Learning Disability Services and Dundee Drug and Alcohol Recovery Services have established adverse incident review groups to further support this work.

Event Severity	2019	2020	2021	2022	2023	2024
EXTREME (RED): Category 1 Event	0(0)	1(1)	0(0)	1(1)	1(1)	0(2)
MAJOR (AMBER): Category 1 Event	0(0)	0(0)	0(0)	1(2)	0(0)	1(1)
MODERATE (YELLOW): Category 2 Event	0(0)	0(0)	0(0)	1(1)	8(9)	20(15)

d. Feedback

d.1 Complaints

The table below shows the number of complaints by service area and how long they have been open:

Current complaints as at 13/12/2024

Clinical Care Group/Department	Days_Band	0-5 Days	6-10 Days	16-20 Days	>20 Days	>40 Days	Total
Mental Health (Dundee)		1	1	-	3	1	6
Physiotherapy (Dundee HSCP)		-	-	1	-	-	1
General Practice - Dundee HSCP		-	1	-	-	-	1
Corporate (Dundee HSCP)		-	1	-	-	-	1
Older People Services (Dundee)		-	-	-	-	1	1
Total		1	3	1	3	2	10

Complaints management continues to perform moderately well across the partnership. Ongoing collaboration with the Patient Experience Team to continue to improve this position will remain in place.

Key Themes

d.2 The key themes and sub themes for complaints are shown in the chart below.

Every complaint is reviewed to understand what did happen, what should have happened and, where a difference exists, what measures can be taken to reduce the likelihood of a similar incident occurring again.

All teams are asked to report on their complaints through the CCPG Group and Forum to ensure the sharing of learning across the Health and Social Care Partnership.

Learning from Complaints

d.3 There is an emerging issue for patients who wish to be prescribed Glucagon-Like Peptide-1 agonist medications (GLP-1s) which have been approved by Scottish Medicines Consortium but patient pathways are still to be agreed in Tayside. A short life working group to consider patients pathways in Tayside is planned. Weight Management services will monitor further complaints. Information relating to GLP-1s has been added to our patient letters and website. Communication has also been circulated to the primary care advising that referrals for anti-obesity medications will not be accepted.

d.4 Positive feedback

The development of the Care Opinion feedback system continues across the HSCP. This will provide additional direct patient feedback for teams to reflect upon.

Scottish Public Services Ombudsman Reports

- d.5 There are currently three cases with the ombudsman under investigation. These are across Psychiatry of Old Age, Medicine for the Elderly and Mental Health services.

External Reports & Inspections

- d.6 There have been no external inspections during this reporting period.

e. Mental Health

Mental Health Key Performance Indicators

- e.1 The suite of mental health measures for Dundee is intended to provide assurance and allow for scrutiny of mental health services delegated to Dundee IJB. The indicators have been developed in tandem with a suite of substance use measures being developed for the purpose of presenting information regarding performance within NHS Tayside functions. The suite of indicators is dynamic and can be improved and enhanced. Collaborative work with both Perth & Kinross and Angus HSCPs is ongoing to determine the final position for mental health key performance indicators.

Community Mental Health Team (CMHT) Activity

- e.2 The following series of graphs relate to the demand, activity and waiting lists across the East and West Community Mental Health Teams. This data demonstrates that the demand on CMHT services has increased from pre-COVID levels and appears to be remaining at those increased levels.

CMHTs remain entirely dependent on Locum Consultant staffing and the differences between East and West Teams are largely resultant from a difference in stability across that staff group, as well as a historic difference in baseline staffing levels (for medics).

CMHT West's list shows an upward trend in new additions to outpatient waiting list and new referral numbers. New outpatient attendance remains steady.

High level of sickness absence and vacancies are impacting on ability to reduce waiting list due to staff absorbing caseloads where individuals are absent or there are vacant post. The focus is on safe and effective care of existing patients. Consultant cover remains steady.

Financial challenges have impacted on ability to recruit to vacant posts however detailed planning is underway to ensure risk-based approach in place to support recruitment decisions.

East Team continues to offer Near Me as a platform to engage with service users.

CMHT West's waiting list continues in an upward trend and may be linked with the allocation of GP practices aligned to each CMHT. West have a higher number of practices aligned to their service and demographically there are a higher number of students registered in a practice in the West. West continues to push towards seeing more new patients to reduce the waiting list number. The consultation is ongoing around review of GP allocation for CMHTs.

A third Locum Consultant commenced on 3 May 2024 and discussions around an additional consultant to offer remote sessions are ongoing.

e.3 Volume of referrals received for vetting, including those vetted and returned, grouped by referral received month:

e.4 Volume of new outpatient attendances, excluding did not attends, grouped by attendance month:

e.5 Volume of referrals added to the waiting list for a new appointment, grouped by referral month:

e.6 Snapshot of waiting list position at month end; total volume on waiting list and volume waiting over 12 weeks:

e.7 Snapshot waiting list distribution by weeks waiting at a point in time (05/06/2024) – Waiting List Type – True WL

CMHT (East)

CMHT (West)

e.8 Volume of return outpatient attendances, excluding did not attends, grouped by attendance month:

6.0 POLICY IMPLICATIONS

6.1 This report has been subject to the Pre-IIA Screening Tool and does not make any recommendations for change to strategy, policy, procedures, services or funding and so has not been subject to an Integrated Impact Assessment. An appropriate senior manager has reviewed and agreed with this assessment.

7.0 RISK ASSESSMENT

Risk 1 Description	The risk of not providing sufficient assurance through governance assurance routes will reduce confidence in the ability of the HSCP to deliver safe, quality care.
Risk Category	Governance
Inherent Risk Level	Likelihood (2) x Impact (4) = Risk Scoring (8)
Mitigating Actions (including timescales and resources)	Systems in place for all operational teams to provide exception reports to the clinical, care and professional governance group. 'Getting It Right' Group established to support development of reporting framework for HSCP.
Residual Risk Level	Likelihood (2) x Impact (4) = Risk Scoring (8)
Planned Risk Level	Likelihood (1) x Impact (3) = Risk Scoring (3)
Approval Recommendation	The risk level should be accepted with the expectation that the mitigating actions are taken forward.

8.0 CONSULTATIONS

- 8.1 The Chief Finance Officer, Chief Officer, Locality Managers and the Clerk were consulted in the preparation of this report.

9.0 BACKGROUND PAPERS

- 9.1 Appendix 1: Dundee HSCP Governance Structure

Dr David Shaw
Clinical Director

DATE: 15 January 2025

Jenny Hill
Head of Service

Angela Smith
Interim Head of Health and Community Care

Matthew Kendall
Allied Health Professions Lead

Niki Walker
Clinical Governance Facilitator

Level of Assurance		System Adequacy	Controls	<input type="checkbox"/>
Substantial Assurance		A sound system of governance, risk management and control exists, with internal controls operating effectively and being consistently applied to support the achievement of objectives in the area audited	Controls are applied continuously or with only minor lapses.	
Reasonable Assurance		There is a generally sound system of governance, risk management and control in place. Some issues, non-compliance or scope for improvement were identified which may put at risk the achievement of objectives in the area audited.	Controls are applied frequently but with evidence of non-compliance.	<input checked="" type="checkbox"/>
Limited Assurance		Significant gaps, weaknesses or non-compliance were identified. Improvement is required to the system of governance, risk management and control to effectively manage risks to the achievement of objectives in the area audited.	Controls are applied but with some significant lapses.	
No Assurance		Immediate action is required to address fundamental gaps, weaknesses or non-compliance identified. The system of governance, risk management and control is inadequate to effectively manage risks to the achievement of objectives in the area audited.	Significant breakdown in the application of controls.

Dundee HSCP Governance Structure

Dundee HSCP governance structures are outlined in the diagram below. The following narrative explains how each of the aspects functions to provide assurance to NHS Tayside and the Dundee IJB.

Dundee Health and Social Care Partnership Clinical, Care and Professional Governance Group is responsible for directing, collating and monitoring governance arrangements and ensuring that there are effective and embedded systems for Clinical, Care & Professional Governance in all services within Dundee Health and Social Care Partnership. It is chaired by the Clinical Director, and membership, as referenced in the terms of reference, extends to Head of Health and Community Care Services, Associate Nurse Director, Associate Medical Director, Associate Locality Managers, Lead Allied Health Professional, Lead Nurse, Lead Pharmacist, Clinical Governance Lead, Senior Officer – Business Planning and Information Governance, NHS Business Support Representative.

Management structures across Dundee HSCP have been redesigned over the past three months and the members of the CCPG Group will be updated to reflect this and the Primary Governance Group Structure which sits beneath the CCPG Group.

At each CCPG Group meeting each Primary Governance Group will present an exception report highlighting key areas of concern across the six domains listed in GIRFE. They will also reference exceptional pieces of work undertaken, current challenges and future potential issues identified through triangulation of data reviewed through Primary Governance Group meetings.

Each Primary Governance Group will produce an annual report in line with the reporting programme.

A range of additional reports are also reviewed at the CCPG Group, which includes DHSCP Analysis Report (Adverse events and Risks), Complaints, Infection Prevention and Control and Inspection Reports.

Further assurance is sought with a range of reports/discussions relating to topics such as professional registration, GDPR, SPSO, contemporaneous issues for example Dundee Drugs Commission review and Trust and Respect Report.

Primary Governance Groups (PGG)

There are currently nine PGGs:

- In Patient & Day Care Services (MfE, Stroke and Neurology, Palliative)
- Adult Community Services
- Acute and Urgent Care
- Mental Health & Learning Disabilities
- Psychological Therapies
- Primary Care & Health Inclusion
- Nutrition and Dietetics
- Dundee Drugs and Alcohol Recovery & Tayside Sexual and Reproductive Health Services
- Older People's mental Health and Care Homes

Each Primary Governance Group will meet monthly and the remit of the Primary Governance Group is to:

- Provide assurance to the Clinical, Care and Professional Governance Group on the systems and processes for clinical, care and professional governance activities.
- Develop, prioritise, implement, monitor and review the annual work plan for clinical, care and professional governance activities.
- To create the learning environment and conditions within Services by dedicating time to allow staff to share learning, tools and other resources and encourage the dissemination of good practice.
- Ensure that clinical and care leadership underpins Service assurance processes and that clinical and care leaders are supported to share tools and resources to spread good practice.
- Encourage an integrated approach to quality improvement across Services.
- Ensure appropriate actions in relation to clinical, care and professional governance and quality activities are taken in response to internal reports and external reports from bodies such as NHS Healthcare Improvement Scotland, Care Inspectorate, Audit Scotland, Mental Welfare Commission and Scottish Public Services Ombudsman.

- Ensuring that there is a robust reporting and assurance mechanism for services which are hosted within the partnership but do not solely operate within Dundee Health and Social Care Partnership.
- Undertake the management, escalation or cascading of issues/risks/concerns as appropriate.
- Collate, review and analyse core and service specific datasets to inform exception report to the CCPGG, reflecting the six domains described in the Getting It Right for Everyone – A Clinical, Care and Professional Governance Framework.
- The exception report should include, but is not limited to:
 - Emergent issues of concern identified
 - Adverse Events:
 - Recurring themes, Major and Extreme Incidents
 - Incidents that trigger Statutory Duty Of Candour
 - All Red Adverse Events
 - Adverse Event Reviews, Significant Case Reviews
 - Complaints
 - Risks
 - Inspection Reports and Outcomes
 - Changes to standards, legislation and guidelines
 - Outcomes of care
 - Adherence to standards
 - Sharing of learning

A representative from each PGG will represent the group at the Dundee HSCP CCPG Group and present and talk to the exception report and, where required, the annual report. The representative will act as a conduit between the PGG and CCPGG ensuring effective communication between groups.

Due to the recent redesign of the management structure, there have been changes in the organisation of the PGGs. The Governance team, alongside the professional leads in the HSCP are working closely with the new chairs of these PGGs to support development of these groups.

Governance Huddle

There is a weekly governance huddle attended by the professional leads and the governance team. A high level review of all adverse events is undertaken with the intention of identifying themes or patterns and triangulating knowledge of service pressures, governance scorecards and service data to identify services who may be struggling, who require support to manage adverse events or who may display a change in their current performance in relation to managing adverse events. This allows for early support to be provided to teams from both a governance and managerial perspective to undertake early management of developing potential risks.

The huddle is open to managers to attend to gain an enhanced overview of the governance arrangements across the HSCP. Managers can also attend to discuss specific aspects of clinical, care and professional governance as required.

The huddle will also undertake work to review risk management, complaints process and quality and any other governance-related theme as required.

Clinical, Care and Professional Governance Forum

The forum is used as an education forum for managers and lead governance staff across the HSCP. The format allows for review of scorecard data, encouraging discussion around works of excellence and challenging areas, with managers peer-reviewing one another and sharing learning across a range of themes.

Each forum will also have a dedicated educational element to improve knowledge and understanding of governance systems and processes across the HSCP. Subjects to date have included: Qlikview, Risk Management System, Datix system report building and scorecard development.
