The Action Programme

The preparation of an Action Programme is a requirement under Section 21 of the Town and Country Planning (Scotland) Act 1997, as amended.

This Action Programme has been prepared in support of the Dundee Local Development Plan 2 and highlights the actions, including key infrastructure and other projects that will be required to deliver each of the policies and proposals contained in the Local Development Plan 2. The programme must also identify the name of the person who is to carry out each action and the timescale for the conclusion of each action.

The Town and Country Planning (Development Planning) (Scotland) Regulations 2008 do not specify what particular types of action should be included, though these may be expected to include the delivery of key infrastructure and the preparation of planning guidance.

It is the intention of the Council to be proactive and work in partnership with other organisations in seeking to attract and facilitate appropriate development for the benefit of the City. The Action Programme highlights a range of key partners who are to be involved in the various proposals and projects. Partner contributions are likely to be varied and will include a range of services including funding, project management, design or other professional services.

To ensure the efficient delivery of the Dundee Local Development Plan 2, it is necessary to identify the infrastructure that will be required to facilitate proposals or projects, as early as possible, to give confidence to key stakeholders, developers and funders. Some actions listed in this document do not necessarily have confirmed project teams, designed details or secured funding. Where constraints to their implementation are known, these have been highlighted. Funding for a number of the schemes contained within the Action Programme will be dependent on future Scottish Government spending reviews and public and private sector finance.

The content of the Action Programme has been prepared in consultation with Council Departments, Key Stakeholders, the Scottish Government and other organisations specified in the document.

After the adoption of the Dundee Local Development Plan 2 the Action Programme will be published by the City Council and will be reviewed and updated on a regular basis. An updated Action Programme will be published every 2 years.

The Action Programme is available via the website at:

Structure

This document is structured in several broad sections. Firstly it sets out the national and strategic actions. These are generally actions set out in the TAYplan Strategic Development Plan, the delivery of which is supported by the Local Development Plan strategy. The following section sets out the constraints, actions and timescales against each of the allocated sites. This is largely focused on housing delivery but also the delivery of development on the vacant sites within the Economic Development Areas, Commercial Centres and Leisure Parks. Monitoring of the progress of the outcomes from each Local Development Plan policy are then considered.
