Appendix 2 Glossary and Terms	Page 15

# SECTION 1 : INTRODUCTION

The annual audit of housing land provides a factual statement of land supply within the administrative boundaries of Dundee City Council. The audit is based on a survey carried out in April 2015.

The audit remains an important source of information for the monitoring of the [Dundee Local Development Plan 2014](#) and [TAYplan Strategic Development Plan 2012](#)

TAYplan requires that housing land within Dundee be identified to accommodate an annual build rate of 610 units. The draft audit identifies that there is an existing generous effective supply of land for housing across the City.

The Draft Dundee Housing Land Audit 2015 has been prepared in line with the Scottish Planning Policy (SPP, 2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

## SECTION 2 : GENERAL PRINCIPLES

The audit provides a range of information relating to each housing site:

- The schedules in Sections 5, 6 and 7 are grouped by effective supply and constrained supply, as defined by the SPP, and within PAN 2/2010.
- Each site has a unique site reference followed (where appropriate) by the Local Development Plan reference, the name of the site and the owner, developer or applicant.
- The status of the site relates to whether the site is under construction, identified in the Local Development Plan or has planning permission or other Council approval.
- The approval date given refers to the latest date that planning permission was issued.
- The number of houses still to be completed on each site is included and an assessment is made of the potential yield from the site in the programming columns

All sites in the Dundee City Council area fall within the Greater Dundee Housing Market Area.

The potential yield figures included within the audit take into account past trends and completions, either on-site or within the housing market area. The effects of the continuing difficulties for the house-building industry have been considered and where appropriate a cautious approach has been adopted in predicting future yield from development sites. More generally, emphasis is made that the likely yield is indicative and will undoubtedly vary from the actual figure.

Section 10 sets out the total number of completions by tenure; this includes the completions from small sites (5 or less units) that are set out in Section 8.

## SECTION 3 : CONSULTATION

The audit was sent out for consultation to the Scottish Government's Housing and Regeneration Directorate; Homes for Scotland; Scottish Water; the Dundee Local Development Plan mailing list and members of the public via the Dundee City Council website.

A meeting was held with Homes for Scotland (HfS) and several of their members to go through the comments HfS had made to the Draft Housing Land Audit (HLA) 2015.

It was agreed that issues can arise as a result of the audit process that considers sites at March 2015. Since that time completion rates and phasing can change as sites progress at different rates than anticipated and planning permission can also lapse post March 2015.

HfS made comments on several sites that currently have planning permission and suggested alterations to the programming. The finalised audit has been updated to reflect the majority of these suggested changes.

Changes to programming were also requested for sites that have not been granted permission. In order to apply a consistent approach to the HLA the Council have retained the site capacity that has been established in the Dundee Local Development Plan 2014.

HfS raised concerns that a number of sites should be deemed as non-effective as the planning permission had expired. The Council clarified those sites had valid permission at the time of the audit and so were effective over the audit year. Where planning permission has not been renewed or new applications for planning permission have not been approved then the sites in question will be removed from the Dundee HLA 2016.

HfS also raised concerns over the number of sites within the Council's ownership. The Council provided an update on the internal joint working group that was established to progress the active promotion and disposal of Council owned land in line with the LDP, Planning Frameworks and Site Planning Briefs. Over the last year the group has met with national and local housebuilders to promote sites and to consider creative and innovative ways of delivering housing. A range of Council owned sites throughout the City have been marketed, each site has been sold demonstrating that there is an encouraging interest amongst housebuilders in the Dundee housing market. The Council are committed to build on this progress and work with housebuilders to progress the sites through the planning process.

A number of planning consultants commented on behalf of developers and landowners on the HLA 2015 requesting the inclusion of their client's sites to the audit. However, these sites were neither allocated in the Dundee LDP 2014 or had the benefit of planning permission or any other approval. Therefore they have not been included in the finalised Housing Land Audit 2015.

# APPENDIX 1 : EFFECTIVENESS CRITERIA

The following criteria for judging the effectiveness of housing sites within the established supply are taken from PAN 2/2010: Affordable Housing and Housing Land Audits.

**Ownership:** : the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal.

**Physical:** : the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply.

**Contamination:** previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

**Deficit Funding:** any public funding required to make residential development economically viable is committed by the public bodies concerned.

**Marketability:** the site, or a relevant part of it, can be developed in the period under consideration.

**Infrastructure:** the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development.

**Land Use:** housing is the sole preferred use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing being a realistic option.

## APPENDIX 2: GLOSSARY OF TERMS

The definitions of terms used within the draft audit reflect the glossary contained in the SPP (February 2010).

**Brownfield land:** land which has previously been developed. The term may encompass vacant or derelict land; infill sites; land occupied by redundant or unused buildings; and developed land within the settlement boundary where further intensification of use is considered acceptable

**Constrained housing land supply:** the part of the established housing land supply which at the time of any audit is not considered to be effective.

**Effective housing land supply:** the part of the established housing land supply that is free or is expected to be free of development constraints in the period under consideration, and will therefore be available for the construction of housing.

**Established housing land supply:** the total housing land supply – including both constrained and unconstrained sites. This will include the effective housing land supply, plus the remaining capacity of sites under construction; sites with planning consent; sites in adopted local plans; and other land and buildings with agreed potential for housing development.

**Greenfield land:** land which has never been previously developed, or fully-restored formerly derelict land which has been brought back into active or beneficial use for agricultural, forestry, environmental purposes, or outdoor recreation.

**Housing Land Audit:** the mechanism for monitoring the housing land supply and identifying those sites within the established land supply which are expected to be effective within the period under consideration.

**Housing Land Requirement:** the difference between a figure arrived at by considering market demand, demographic need and other relevant factors, and the effective housing land supply.

**Housing Market Area:** a geographical area which is relatively self-contained in terms of housing demand; i.e. a large percentage of the people moving home or settling in the area will have sought a dwelling only in that area.

**Private sector housing:** housing for sale or rent provided by private developers or other commercial organisations. The term “owner-occupied sector” excludes the private rented element.

**Public sector housing:** general and special needs housing provision by registered social landlords and local authorities and other social housing providers for rent.
