# **SECTION 1: INTRODUCTION**

The annual audit of housing land provides a factual statement of land supply within the administrative boundaries of Dundee City Council. The audit is based on a survey carried out in April 2018.

The audit is an important source of information for the monitoring of the **Dundee Local Development Plan 2014** and **TAYplan Strategic Development Plan.** 

Since the previous audit in 2017 the TAYplan Strategic Plan 2016-2036 has been adopted and sets the housing supply target for the Dundee Housing Market Area. In addition the Proposed Dundee Local Development Plan 2 (PDLDP2) has been prepared and is currently subject to examination by the Planning & Environmental Appeals Division. The HLA 2018 has sought to reflect the most up to date picture of effective land supply within the city through the addition of new PDLDP2 sites as well as removal of sites that have not been carried forward from Dundee LDP1 2014.

In light of this the audit identifies that there is an existing generous effective supply of land for housing across the City.

The Dundee Housing Land Audit 2018 has been prepared in line with Scottish Planning Policy (SPP, 2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

# **SECTION 2 : GENERAL PRINCIPLES**

The audit provides a range of information relating to each housing site:

- The schedules in Sections 5, 6 and 7 are grouped by effective supply and constrained supply, as defined by the SPP, and within PAN 2/2010.
- Each site has a unique site reference followed (where appropriate) by the Local Development Plan reference, the name of the site and the owner, developer or applicant.
- The status of the site relates to whether the site is under construction, identified in the Local Development Plan or has planning permission or other Council approval.
- The approval date given refers to the latest date that planning permission was issued.
- The number of houses still to be completed on each site is included and an assessment is made of the potential yield from the site in the programming columns

All sites in the Dundee City Council area fall within the Greater Dundee Housing Market Area.

The potential yield figures included within the audit take into account past trends and completions, either on-site or within the housing market area. The effects of the continuing challenges for the house-building industry have been considered and where appropriate a cautious approach has been adopted in predicting future yield from development sites. More generally, emphasis is made that the likely yield is indicative and will undoubtedly vary from the actual figure.

Section 10 sets out the total number of completions by tenure; this includes the completions from small sites (5 or less units) that are set out in Section 8.

# **SECTION 3: CONSULTATION**

The Draft Housing Land Audit (HLA) 2018 was sent out for consultation to the Scottish Government's Housing and Regeneration Directorate; Homes for Scotland (HfS); Scottish Water; the Dundee Local Development Plan mailing list and members of the public via the Dundee City Council website.

In the preparation of the Draft HLA 2018, the Council sought to enhance engagement with developers/ agents through the introduction of a pre-draft consultation stage. This provided an opportunity for developers/agents to provide up to date programming information for the sites that were in the previous audit and the new Proposed LDP2 sites which would be introduced into the Draft HLA 2018. This consultation was well received and provided vital programming information which informed the content of the Draft HLA 2018. The Finalised HLA 2018 has been informed by the information and comments received through the pre-draft and draft consultations as well as site visits and existing information and knowledge that the Council has on each of the sites including Strategic Housing Investment Plan (SHIP) funding, marketing and site disposal information.

Homes for Scotland (HfS) provided comments regarding the effectiveness of a range of allocated sites as well as those that have planning permission and suggested alterations to the programming. The finalised audit has been updated to take in to account these comments, with programming updated where appropriate. HfS raised concerns regarding sites which have been deemed as effective in the Draft HLA 2018 despite there not being a valid planning application on 31st March 2018. HfS have indicated that they would deem these sites as non-effective. The Council agrees with this position and has amended the content of audit to reflect these comments.

Clarification has also been sought by HfS on a number of matters including:

- receipt of programming information from developers:
- information on the year sites where added to the audit:
- construction and completion programming; and
- specific details in relation to Dundee City Council owned sites in terms of SHIP funding, marketing and disposal.

By way of response the Council sought programming information from developers through the pre-draft and draft consultation stages and updated the HLA accordingly. The current approach to referencing the HLA sites is to include the year it was added into the reference number e.g. 200356 was added in 2003, 201824 was added in 2018. The Council provided further clarity to HfS in relation to the Council owned sites and any relevant SHIP funding, marketing and disposal information.

A number of planning consultants commented on behalf of developers questioning the marketability of sites as well as the reliance on brownfield land. They stated the existing land supply could not be considered generous and questioned the reliance of housing supply provision on brownfield sites and the Western Gateway. These issues have also been raised through the preparation of the Proposed Local Development Plan 2. The Housing Land Audit is not a mechanism for setting the housing strategy or for allocating new sites and therefore no further action is required in relation to these issues.

The Housing Land Audit is a snapshot in time of the amount of land that is available for construction at the time of the survey, which was March 2018. Issues therefore may arise as completion rates and phasing can change as sites progress at different rates than anticipated and planning permission can also lapse post March 2018. In order to provide more clarity on this matter a new section has been added to the HLA - Section 12 - which provides information on completion analysis and the projections to the end of the Proposed Local Development Plan 2 period (2026).

Over the past year the Council has continued to meet with national and local housebuilders as well as housing associations regarding a broad range of sites throughout the City. The upturn in private housebuilding has been demonstrated by the increase in planning approvals, site starts and housing completions which overall has demonstrated a growing confidence in the Dundee housing market.

There has also been continued interest and offers on all of the Council owned sites that were brought forward and the Council is committed to building on this success. The demand for land for housing in Dundee has continued in the past year to enable the delivery of the Scottish Government's Affordable Housing Supply Programme funding within Dundee through the Strategic Housing Investment Plan. Given the considerable grant funding for affordable housing and the continued success of private housebuilding across the City the Council consider that the sites in the HLA 2018 are effective and do not have marketability constraints as they offer a range and choice of housing across all tenures.

# Section 4: Dundee City - Summary

# **SECTION 12: COMPLETION ANALYSIS & PROJECTIONS (2014-2026)**

Since 2014 there has been a steady year on year increase in housing completions within Dundee. It is noted that in comparison to recent years the number of completions in 2017/18 has decreased, however there were a significant number of starts with 529 units on site including several large flatted developments under construction. In light of this it is expected that completions will even out over the next couple of years with an expected upward trend of all housing tenures across the City including continued progress on major developments at the Dundee Western Gateway and the Central Waterfront

# **APPENDIX 1: EFFECTIVENESS CRITERIA**

The following criteria for judging the effectiveness of housing sites within the established supply are taken from PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

Ownership: the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal.

**Physical**: the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply.

**Contamination**: previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

**Deficit Funding**: any public funding required to make residential development economically viable is committed by the public bodies concerned.

**Marketability**: the site, or a relevant part of it, can be developed in the period under consideration.

**Infrastructure**: the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development.

Land Use: housing is the sole preferred use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing being a realistic option.

# **APPENDIX 2: GLOSSARY OF TERMS**

The definitions of terms used within the audit reflect the glossary contained in the SPP, (2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

**Brownfield land:** land which has previously been developed. The term may encompass vacant or derelict land; infill sites; land occupied by redundant or unused buildings; and developed land within the settlement boundary where further intensification of use is considered acceptable

**Constrained housing land supply:** the part of the established housing land supply which at the time of any audit is not considered to be effective.

**Effective housing land supply:** the part of the established housing land supply that is free or is expected to be free of development constraints in the period under consideration, and will therefore be available for the construction of housing.

**Established housing land supply:** the total housing land supply – including both constrained and unconstrained sites. This will include the effective housing land supply, plus the remaining capacity of sites under construction; sites with planning consent; sites in adopted local plans; and other land and buildings with agreed potential for housing development.

**Greenfield land:** land which has never been previously developed, or fully-restored formerly derelict land which has been brought back into active or beneficial use for agricultural, forestry, environmental purposes, or outdoor recreation.

**Housing Land Audit:** the mechanism for monitoring the housing land supply and identifying those sites within the established land supply which are expected to be effective within the period under consideration.

**Housing Land Requirement:** the difference between a figure arrived at by considering market demand, demographic need and other relevant factors, and the effective housing land supply.

**Housing Market Area:** a geographical area which is relatively self-contained in terms of housing demand; i.e. a large percentage of the people moving home or settling in the area will have sought a dwelling only in that area.

**Private sector housing**: housing for sale or rent provided by private developers or other commercial organisations. The term "owner-occupied sector" excludes the private rented element.

**Public sector housing:** general and special needs housing provision by registered social landlords and local authorities and other social housing providers for rent.
