Section 10 : Sites Removed for Definitional Reasons	Page 14
Section 11 : Completions by Tenure	Page 15
Section 12 : Completion Analysis & Projections (2014-2026)	Page 15
Appendix 1 Effectiveness Criteria	Page 16
Appendix 2 Glossary and Terms	Page 17

SECTION 1 : INTRODUCTION

The annual audit of housing land provides a factual statement of land supply within the administrative boundaries of Dundee City Council. The audit is based on a survey carried out in April 2018.

The audit is an important source of information for the monitoring of the **Dundee Local Development Plan 2014** and **TAYplan Strategic Development Plan**.

Since the previous audit in 2017 the TAYplan Strategic Plan 2016-2036 has been adopted and sets the housing supply target for the Dundee Housing Market Area. In addition the Proposed Dundee Local Development Plan 2 (PDLDP2) has been prepared and is currently subject to examination by the Planning & Environmental Appeals Division. The HLA 2018 has sought to reflect the most up to date picture of effective land supply within the city through the addition of new PDLDP2 sites as well as removal of sites that have not been carried forward from Dundee LDP1 2014.

In light of this the audit identifies that there is an existing generous effective supply of land for housing across the City.

The Dundee Housing Land Audit 2018 has been prepared in line with Scottish Planning Policy (SPP, 2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

SECTION 2 : GENERAL PRINCIPLES

DRAFT

The audit provides a range of information relating to each housing site:

- The schedules in Sections 5, 6 and 7 are grouped by effective supply and constrained supply, as defined by the SPP, and within PAN 2/2010.
- Each site has a unique site reference followed (where appropriate) by the Local Development Plan reference, the name of the site and the owner, developer or applicant.
- The status of the site relates to whether the site is under construction, identified in the Local Development Plan or has planning permission or other Council approval.
- The approval date given refers to the latest date that planning permission was issued.
- The number of houses still to be completed on each site is included and an assessment is made of the potential yield from the site in the programming columns

All sites in the Dundee City Council area fall within the Greater Dundee Housing Market Area.

The potential yield figures included within the audit take into account past trends and completions, either on-site or within the housing market area. The effects of the continuing challenges for the house-building industry have been considered and where appropriate a cautious approach has been adopted in predicting future yield from development sites. More generally, emphasis is made that the likely yield is indicative and will undoubtedly vary from the actual figure.

Section 10 sets out the total number of completions by tenure; this includes the completions from small sites (5 or less units) that are set out in Section 8.

DRAFT

SECTION 3 : CONSULTATION

The draft audit has been sent out for consultation to the Scottish Government's Housing and Regeneration Directorate; Homes for Scotland; Scottish Water; and the public via the Dundee City Council Website.

The results of this consultation will appear here.

SECTION 12 : COMPLETION ANALYSIS & PROJECTIONS (2014-2026)

Since 2014 there has been a steady year on year increase in housing completions within Dundee. It is noted that in comparison to recent years the number of completions in 2017/18 has decreased, however there were a significant number of starts with 529 units on site including several large flatted developments under construction. In light of this it is expected that completions will even out over the next couple of years with an expected upward trend of all housing tenures across the City including continued progress on major developments at the Dundee Western Gateway and the Central Waterfront

APPENDIX 1 : EFFECTIVENESS CRITERIA

The following criteria for judging the effectiveness of housing sites within the established supply are taken from PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

Ownership: the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal.

Physical: the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply.

Contamination: previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

Deficit Funding: any public funding required to make residential development economically viable is committed by the public bodies concerned.

Marketability: the site, or a relevant part of it, can be developed in the period under consideration.

Infrastructure: the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development.

Land Use: housing is the sole preferred use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing being a realistic option.

APPENDIX 2: GLOSSARY OF TERMS

The definitions of terms used within the audit reflect the glossary contained in the SPP, (2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

Brownfield land: land which has previously been developed. The term may encompass vacant or derelict land; infill sites; land occupied by redundant or unused buildings; and developed land within the settlement boundary where further intensification of use is considered acceptable

Constrained housing land supply: the part of the established housing land supply which at the time of any audit is not considered to be effective.

Effective housing land supply: the part of the established housing land supply that is free or is expected to be free of development constraints in the period under consideration, and will therefore be available for the construction of housing.

Established housing land supply: the total housing land supply – including both constrained and unconstrained sites. This will include the effective housing land supply, plus the remaining capacity of sites under construction; sites with planning consent; sites in adopted local plans; and other land and buildings with agreed potential for housing development.

Greenfield land: land which has never been previously developed, or fully-restored formerly derelict land which has been brought back into active or beneficial use for agricultural, forestry, environmental purposes, or outdoor recreation.

Housing Land Audit: the mechanism for monitoring the housing land supply and identifying those sites within the established land supply which are expected to be effective within the period under consideration.

Housing Land Requirement: the difference between a figure arrived at by considering market demand, demographic need and other relevant factors, and the effective housing land supply.

Housing Market Area: a geographical area which is relatively self-contained in terms of housing demand; i.e. a large percentage of the people moving home or settling in the area will have sought a dwelling only in that area.

Private sector housing: housing for sale or rent provided by private developers or other commercial organisations. The term “owner-occupied sector” excludes the private rented element.

Public sector housing: general and special needs housing provision by registered social landlords and local authorities and other social housing providers for rent.
