

## Terrence Higgins Trust – Can't Pass It On; Training for Healthcare Professionals

We're really excited to let you know that the *Can't Pass It On* training website is finally up and running. THT launched this first-of-its-kind training on World AIDS Day 2021 with the aim of helping (healthcare) professionals to increase their awareness and understanding of "Can't Pass It On" / "U=U".

From the people in the video on the training website:

*"This World AIDS Day I'm really proud to have been part of this Can't Pass It On training that teaches healthcare professionals the fact that as someone living with HIV with an undetectable viral load I can't pass the virus on to my sexual partners. It gives them the scientific evidence behind this, answers any difficult questions they may have as well as teaches them about how to have conversations about this with their patients."*

*Please help me by sharing this with any healthcare professionals you know, as research has proven that there is still a long way to go before the message reaches everyone who would benefit from hearing it."*

Gilead started promoting the site on World AIDS Day 2021 on PulseToday.co.uk, Patient.info, Gpnotebook.co.uk, doctors.net.co.uk, BMJ.com, and nursingtimes.net and launched an email campaign on to 22,000 GPs and 10,000 secondary care healthcare professionals.

Please circulate as appropriate among your networks: you can find the training website [here](#).

If anyone needs any further information, please contact me.

Kind regards
